

Your **pexagon**
Personalized Products
Fundraising Company

Fundraising Program Overview - Thank you for your interest in our Fundraising Programs. We have several different options available. Regardless of the program(s) you choose, your school or organization will earn at least 20% of the product's web price.

Given that schools and organizations have an increasing need for fundraisers, and traditional fundraising (candy, cookie dough, et al) is frowned upon for health reasons, Pexagon presents a unique and timely set of programs to raise meaningful funds while contributing to a responsible and progressive computing environment.

Pexagon's personalized USB Flash Drives are available in a variety of styles, capacities, colors and are custom laser engraved at no additional cost. Engraving options include school name, mascot/logo, teacher name, student name and other personalized information. Pexagon's flash products are durable and *with a lifetime warranty, it may be the only flash drive they ever need. Furthermore, with their name on it, they're not likely to lose it!*

Personalized Products Fundraising Programs are available in a variety of formats:

I. Revenue Share Fundraiser Code

In this program, a school or organization signs up for a fundraiser code. All products purchased on the Pexagon web site referencing your fundraising code are eligible for a 20% revenue share (excluding clearance and sale items). Products include a variety of styles of personalized flash drives as well as other personalized products including portable hard drives, pens, picture frames, business card flash drives and other items. The fundraiser is promoted in a variety of ways including an electronic flyer, direct links from your website to Pexagon's website, a web banner and a promotional marketing piece provided by Pexagon. If interested in this program, please request a R.S. application.

II. Custom School Website

Pexagon will set up a custom website for the school to direct students and parents to purchase school branded flash drives at a price negotiated with Pexagon. The school may charge current web price and collect a revenue share, or instead, Pexagon can arrange to offer the drives to students, teachers and parents at a discounted educational price (20% off current web pricing). In this program, the school will choose a specific style flash drive to offer. All flash drives would be engraved with the school logo on the front and two lines of personalized text on the back.

III. Custom Flash Drive Prepaid Cards

Gift Cards can be used for fundraising in 3 different ways:

- 1.) Purchased for resale
- 2.) Pre-sold using order forms
- 3.) Consigned for a specific school event (3 -5 day event); No pre-purchase necessary. Certain criteria must be met to qualify for consignment.

IV. School Store Sales

Many schools buy flash drives in the school color, engraved with the school name, logo, slogan or other information. Students are able to buy from the school store at a price and markup determined by the school. We would sell the school the thumb drives at 20% off current website price and higher discounts apply to larger volume quantities. If interested in this option, please provide the style, quantity and capacity flash drive that you're looking to purchase, and we will email you a product quote specific to your needs.

We look forward to getting you started with the program that best fits your objectives.
